DETAILED ACTION***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 3 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 3, the language, i.e., line 3, renders the claim indefinite, since "each second inwardly extending point" as recited are not positively recited earlier in the claim. The language is narrative in general and ambiguous.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-4 (as best understood) are rejected under 35 U.S.C. 102(b) as being anticipated by Barnhill, III, et al. (4,512,220).

Barnhill, III, et al. discloses all of the limitations of claims 1-4, i.e., a socket having inner opening with six radially outwardly recesses (30) having one flank (11) in the circumferential direction; the recesses forming six radially

Art Unit: 3723

inner point (apex) and twelve radially outer points (see Fig. 5) having a radially outer surface (e.g., 40) between the neighboring one of the outer points having a shape substantially corresponding to a shape of a twelve points wherein every other point is removed; and further having another axial portion having means for connecting to a tool,

col. 3, lines 1 and 2.

Double Patenting

5. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

6. Claims 1-4 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-4 of copending Application No. 10/639,114. Although the conflicting claims are not identical, they are not patentably distinct from each other because subject matter of claims 1-4 of the copending application anticipates claims 1-4 of the instant application since the attempted limitation given to the workpiece does not further limit the socket.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
